SUMMARY Front-End Developer with 3 years of experience building responsive, accessible web applications. Skilled in translating UI/UX designs into clean, efficient code with cross-browser compatibility and mobile-first design. Collaborative team player in agile environments working closely with designers, project managers, QAs, and backend developers.

WORK EXPERIENCE **ThinkBIT Solutions Phils Inc- Bootstrap Developer (Front-End)** **Jan 2025 - Present**

- Participation in planning and providing input to work estimations.
- Development of components according to the specifications received and established standards; delivery of timely components with proper quality.
- Conducted debugging and troubleshooting of front-end issues.
- Collaborated with UI/UX designers, backend developers, and Business Analysts to translate wireframes, APIs and requirements into functional web applications
- Built responsive web applications using a mobile-first approach with cross-browser compatibility
- Participated in Agile Scrum activities including daily stand-ups, sprint reviews, and retrospectives

Project/s:

- **Healthcare Management System** – Developed a web application for clinic operations, including patient, employee, and client records, medical services, file management, financial transactions, reporting, accounting, and system settings. Implemented patient and client portals for accessing medical records, consultation history, prescriptions, laboratory results, certificates, treatment history, and outstanding balances.
- **Pharmacy and Prescription Management System** – Developed new features for a web application for medicine dispensing, prescription management, patient records, inventory management, and PhilHealth claims processing. Implemented mobile responsiveness across the application, print functions, and data tables with filtering and search for claims, beneficiaries, prescriptions, committed drugs, and facilities.
- **Telecommunications Platform** – Maintained a web application by implementing enhancements, change requests, and new features. Investigated and resolved production issues, fixed reported defects, and collaborated with team members during maintenance releases.
- **Timekeeping System** – Participated in the revamp of a chat application by implementing UI updates, modifying existing features, resolving reported issues, and supporting feature delivery.
- **Online Gambling Platform** – Maintained web applications by implementing enhancements, change requests, bug fixes, and UI updates. Developed new features, integrated frontend changes with backend APIs, and supported production releases.

- Developed responsive and interactive web interfaces
- Optimized front-end performance for maximum speed and scalability.
- Collaborated with UI/UX designers, backend developers, and Systems Analysts to translate wireframes, APIs and requirements into functional web applications
- Conducted debugging and troubleshooting of front-end issues
- Optimized front-end performance for maximum speed and scalability
- Maintained code quality through version control systems
- Conducted manual unit testing to achieve 90% code coverage and maintained detailed documentation for future development

Project/s:

- Development of a Web-based application for an insurance company with features including policy management, claims processing with automated workflows, an agent portal for client and policy handling, real-time notifications, analytics and reporting for performance insights, and compliance management. The solution integrates with legacy systems, improves customer engagement through a user portal, and enables agents to manage operations while meeting service standards. Clients are based in Hong Kong.
- Development of a Web-based application for Quisine Kamote Chips(QKC) Inventory system operations, where users can manage inventory, handle dispatch, process orders, generate reports, and track operations.

EDUCATION	Bachelor of Science in Electronics Engineering Dean's Lister Bulacan State University – Malolos, Bulacan	Aug 2018 - Jun 2023
	Accountancy, Business and Management (ABM) With High Honors San Ildefonso College – Tanay, Rizal	Jun 2016 - Apr 2018

TRAININGS / CERTIFICATES	Intoduction to Front-End Development (Meta) Coursera	Sep 2025
	Programming with JavaScript (Meta) Coursera	Oct 2025
	Web Development Bootcamp Training Computer Professionals Inc	Sep 2023 - Nov 2023

SKILLS

- Frontend Development
- REST API Integration
- Agile (Scrum) Methodology
- Communication Skills
- Analytical and Problem Solving Skills
- Attention to Detail
- Debugging and Maintenance
- Team Collaboration and Adaptability

Tech Stack: HTML5, CSS3, JavaScript (ES6+), jQuery, AJAX, React.js, Vue.js, Bootstrap, Tailwind CSS, SCSS/SASS, JSON, Thymeleaf, Blade, JSP, Git, REST APIs, Laravel, Spring Boot, PHP, Java, MySQL, Chart.js. Datatable, Axios

Tools: VS Code, Postman, Figma, Adobe XD, Jira, GitHub, GitLab, Bitbucket, Antigravity, Claude Code, Codex, Chrome DevTools, Git, Npm, CI/CD Pipelines
